

# SLUG DISCHARGE PREVENTION AND CONTINGENCY (SDPC) PLAN RECERTIFICATION STATEMENT

Central Contra Costa Sanitary District (Central San) requires all of its permitted industrial users to develop SDPC Plans in order to prevent slug discharges from reaching the sanitary sewer or to minimize the impact of slug discharges on Central San personnel, facilities, and/or operations. Industrial Users are required to review the SDPC Plan every 24 months for accuracy and either submit an updated plan if changes are made, or certify that the SDPC plan on file with Central San is accurate.

The currently implemented Slug Discharge Prevention and Contingency Plan dated \_\_\_\_\_ has been reviewed and found to be accurate and complete. No changes are necessary at this time.

“I certify under penalty of perjury that this document and all attachments were prepared under my direction or supervision and in accordance with the system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person(s) who manages the system or those directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for knowingly submitting false information, including the possibility of fine and/or imprisonment for knowing violations.”
