

## ABOUT CENTRAL SAN

We are a special district responsible for the collection and treatment of wastewater in parts of Contra Costa County, serving almost 500,000 residents and more than 15,000 businesses.

Our 303 budgeted employees operate and maintain about 1,540 miles of pipe and clean and disinfect over 13 billion gallons of wastewater per year. We are governed by a five-member Board of Directors.

## HOW TO APPLY

Thank you for your interest!

Please visit our website:  
[www.centralsan.org/academy](http://www centralsan.org/academy)  
to apply for our 2025 session.

Applications will close on May 14.

# Central San Academy

Sharing Resources,  
Strengthening Community

[centralsan.org/academy](http://centralsan.org/academy)

## WHEN?

The 2025 Central San Academy will be a series of four sessions held over consecutive Wednesday evenings, from May 21 to June 11, with an additional daytime facilities tour so our participants can see us in action.

## WHERE?

Our 2025 session will be at our Collection System Operations facility at 1250 Springbrook Road in Walnut Creek. Our facilities tour will be at our headquarters in Martinez.

## WHY?

We hold the Academy each year to open our doors to the public and create a place for us and our participants to share information with each other.

We value our customers and want to hear what is important and engaging to you. Our goal in holding the Academy is for you to have a better understanding of your government and the core services we provide.

We look forward every year to sharing what we do to serve this wonderful community, and we hope you will join our next session!

## HAVE QUESTIONS OR WANT TO LEARN MORE?

## EVER WONDER WHAT HAPPENS TO WATER AFTER IT GOES DOWN THE DRAIN?

Our citizens academy provides the answer through an award-winning, behind-the-scenes look at us, your friendly neighborhood sewer service provider!

This program is FREE of charge to participants and offers a rare glimpse into our operations, including how we give used water new life as recycled water through resource recovery.

## BUT IT'S MORE THAN JUST WASTEWATER!

Participants in Central San Academy learn about everything else we do, from pollution prevention, to capital projects construction, piloting new technologies, and more. We do all this in an interactive and eye-opening setting that includes classroom learning, group activities, live demos, and a tour of our facilities.
