

Distance Learning Testimonials

Below you can find testimonials of our distance learning programs from teachers, parents, students, and community members.

Thank you so much for showing me my first science project!!

-Kindergarten student

Thanks for the fun experiment. We had a lot of fun! She really enjoyed your lessons. She wants to be a scientist when she grows up and she was very excited to learn what happens when you flush different types of paper down the toilet.

-Kindergarten parent

Good morning 😊 Just wanted to say awesome class this am. We had fun. It was nice NOT visiting the poop plant 😂 this year. It was a nice change for the class. We enjoyed the presentation and being able to actually do the project as well. He is now making sure we flush only TP down the drain.

-4th grade parent

Thank you for such an engaging field trip this morning! I think the students really enjoyed making a soupy mess and will think a little harder before they pour something down the sink!

-4th Grade Teacher

Thank you so much for the lesson on toilet paper today. My kids loved it! It was such a great idea to ask the teacher to call on students. I have signed up for the kitchen sink one, and I hope we can see you again soon.

-1st grade teacher

Thank you for making the lesson about flushing toilets. Toilet paper breaks up very small. Regular paper breaks up big and can clog the pipes!

-2nd grade student

Thank you so so much for reaching out and thinking of us! We enjoyed your facilitation of the experiment. You opened up their thinking process and made them curious about science. We would LOVE to have you back.

-2nd grade teacher

You are one of the highlights of our year! We would love to continue to learn with you. Not only are you a wonderful scientist but a role model and a wonderful teacher too. Thank you!

-1st grade teacher

Thank you so much for teaching such an engaging lesson. The students were really looking forward to it. I would definitely be interested in a third lesson, and I'm sure my partner teacher would be too. Thank you for the links to the tour and pipe information.

-4th grade teacher

Thank you so much for teaching us what happens when we flush the toilet

-1st grade student

THANK YOU!!!! My students and I really enjoyed your presentation. The other teachers told me they loved it too. I feel like the students learned a lot!

-3rd grade teacher

Thank you for coming to our class to present yesterday. Parents reported that students continued to experiment with different condiments for a long time after our class ended. It was a very engaging activity and students enjoyed it a lot.

-Transitional Kindergarten (TK) teacher

Thank you for the field trip. I learned that paper does not dissolve in water. The field trip was fun!

-2nd grade student
