Features + Benefits

- Hands-on introduction to classroom ready lessons
- \$600 stipend for full participation
- Complimentary breakfast and lunch
- Tour our treatment facilities and local field sites

What happens to our dirty water after it goes down the drain?

Together, we will follow the flow of dirty water from our homes, through our pipes, to our treatment plant, to our laboratory, and out to our local environment.

In the mornings, we will tour relevant Central San facilities. In the afternoons, we will explore complimentary hands-on activities designed especially for grades TK-5. By the end, you'll walk away with a variety of new ideas and activities to share with your students.
